THE PECK REPORT.

sioner PECK, of the State Bureau of Labor Statistics, has put forth a report, the correctness and honesty of which are sed to all the known facts in relation to labor in this State.

Mr. PECE's object seems to be to sustun the unfounded claim of the Republis that wages have increased under the McKinley bill and that business has improved. His "figures" are deceptive, if s purposely doctored, and they are deat once of all reinbility by the refusal of the Commissioner to allow the private returns, upon which they are sed, to be seen. "They are not open to the inspection of the public," says Mr. Prox. and be pretands that he pledged himself to those manufacturers and others who made the returns that they should be kept strictly secret.

Under such circumstances it can read ily be surmised that the returns are fraudion. No one will trust a public officer who evidently uses his position to more of popular music. ify his political spites, and who seeks to cover up false and misleading state. ts by the pretense that the returns on which they are founded are his private property and cannot be made public.

BANITARY SUGGESTIONS.

Dr. L. A. SAYRE proposes a radical policy to prevent the invasion of Asiatic m, with which we are threatened. aggests the propriety of absolutely listing immigration altogether unless perfect and continental quarantine can be secured. Quarantine to be effective, he says, must apply to every serival from infected ports and to every port on this continent and be equally efat at every point.

Dr. Savaz suggests that arrangements should be made with Capada to adopt a this is not done we should cut off all digration from the Dominion by patrol of every line of our border.

OUR OPERATIO WANTS.

The stockholders of the Metropolitan Opers-House are said to be much disestisfied with the action of the Executive Committee. The finances are certainly not in a flourishing condition, and the insignificant amount of the insurance does not speak well for the prudence of the managers.

If the Opera-House is to be rebuilt it must be by voluntary contributions or an assessment on the stockholders. It would be a pity if the house should be suffered to go out of existence. But if it is rebuilt it is to be hoped that it will be on a different plan. The stiff, formal rows of boxes always spoilt the look of the house. BINJAMIN THE WISP.

There is a flutter among !Republican politicians. President Hannison's proposed visit to New York is looked upon with a sort of dread, in the fear that he may be captured by the self-asserting plutocrats of the Union League Club, and made the victim of a "Belshazzar feast" similar to that which helped to defeat BLAINE in 1831.

The banquets of the Union League Club and the fussy friendship of the Union League magnates are fatal to politicians. A candidate who is put through that ordeal may well despair of success.

But how can the Union Leaguers be shaken off? From their pockets come the heavy checks by which the Republicans' "blocks of five" tunds are sun. al plan of strict quarantine, and if plied. It will not do to offend them, and as they consider that they have a proprietary right in a Republican President it is difficult to refuse their invitation to a banquet.
